## Key Terms

**Point-to-Point Cap Rate Strategy:** This strategy provides growth by participating in 100% of the index's growth, if any, up to a specific point, called a 'cap'. For example, if the cap rate is 10% and the index gain is 12%, your interest credit would be capped at 10%. Your interest is credited and locked in for the term you choose.

**Point-to-Point Participation Rate Strategy:** This strategy provides growth by participating in a portion of the index's growth, if any. The interest credited will be calculated as a percentage of the index's growth over the period. For example, if the participation rate is 150% and the index gain is 12%, your interest credit would be 18%. Your interest is credited and locked in for the term you choose.

**Point-to-Point Performance Trigger Rate Strategy:** This strategy provides growth equal to the set trigger rate as long as the index return is positive or flat at the end of the strategy's term. For example, if the trigger rate is 7% and the index gain is above 0%, your interest credit would be 7%. Your interest is credited and locked in for the 1-year term available.

**Fixed Interest Rate Strategy:** This strategy provides growth at a fixed rate. Aspida Life credits fixed interest daily based on the rate established at the beginning of each contact year.
