This material is not authorized for use unless preceded or accompanied by The Power Series of Index Annuities (I6110CON) consumer brochure and Owner Acknowledgment and Disclosure Statement. Rates shown are NOT interest rates (except for the Fixed Interest Account). See page 4 for applicable minimum rates and other important information. New rates may apply after the end of the first index term and are subject to minimum and maximum guarantees. Minimum or maximum rates apply after the end of the first index term. The participation rate is set at 100% unless otherwise noted.

Key terms and information

Enhanced participation rate (EPR): A higher participation rate available in select accounts for an annual fee. For example: **10%** index change x **110%** EPR = **11%** interest earned.
Index rate cap: Maximum percentage of index performance that can be credited as interest over an index term. For example: **10%** index change > **5%** cap = **5%** interest earned.
Participation rate: Percentage of index performance that is used to calculate interest. For example: **10%** index change x **50%** PAR rate = **5%** interest earned.
Premium: Money used to purchase the annuity. In Oregon, a Power Series Index Annuity can only be issued with a single premium. No additional premiums are allowed.
Spread: Minimum percentage or threshold that the index's performance must exceed to be credited interest.
Performance-triggered: Initial declared interest rate is credited to the account if index performance is equal to or greater than the minimum index value change. For example: **10%** index change → **5%** declared interest rate = **5%** interest earned.

Note: Enhanced Participation Rate (EPR) accounts are available for an annual fee. You may receive higher interest credits in EPR accounts, but interest credits are based in part on the performance of an index and not guaranteed. At the end of your contract's withdrawal charge period, if the total amount of EPR strategy fees exceeds the total interest earned in the annuity, the difference will be credited to your annuity.

Annuities are issued by **American General Life Insurance Company** (AGL), Houston, TX.

Both the ML Strategic Balanced Index® and the AB All Market Index® have an embedded annual index cost in the calculations of the change in index value. This embedded index cost will reduce any change in index value, and it funds certain operational and licensing costs. Since it will affect the returns of the indices, it may also impact the amount of interest credited to the index annuity; however, it is not a fee paid by the policy owner or received by the issuing insurance company.

The Product is not sold, sponsored, endorsed or promoted by PIMCO or any other party involved in, or related to, making or compiling the Index. Neither PIMCO, the index calculation agent nor any of the constituent owners provides investment advice to AGL with respect to the Product or to owners of the Product.

Neither PIMCO nor any other party involved in, or related to, making or compiling the Index has any obligation to continue to provide the Index to AGL with respect to the Product. Neither PIMCO nor any other party involved in, or related to, making or compiling the Index makes any representation regarding the Index, Index information, performance, annuities generally or the Product particularly.

PIMCO disclaims all warranties, express or implied, including all warranties of merchantability or fitness for a particular purpose or use. PIMCO shall have no responsibility or liability whatsoever with respect to the Product. The Index is comprised of a number of constituents, some of which are owned by entities other than PIMCO. All disclaimers relative to PIMCO also apply separately to those constituent owners and to the index calculation agent.

Important information on The Power Series of Index Annuities

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be appropriate for all individuals.

Withdrawals may be subject to federal and/or state income taxes. An additional 10% federal tax may apply if you make withdrawals or surrender your annuity before age 59½. Consult your tax advisor regarding your specific situation.

Index interest accounts are not a permanent part of the contract and may be removed due to circumstances beyond the control of American General Life Insurance Company. Such circumstances include, but are not limited to, the discontinuation of an index, a change in the composition or calculation of an index, the inability to license the use of an index and the inability to hedge risks associated with these index interest accounts. Special rules govern how assets in a discontinued index interest account may be reallocated. These rules may differ by state. Please see the Owner Acknowledgment and Disclosure Statement for more information.

All contract and optional benefit guarantees, including any fixed account crediting rates or annuity rates, are backed by the claims-paying ability of the issuing insurance company. They are not obligations of or backed by the distributor, insurance agency or any affiliates of those entities and none makes any representations or guarantees regarding the claims-paying ability of the issuing insurance company.
